HI-FULVIC P8

Liquid Potassium Fulvic Acid is suitable for use in conjunction with most fertilisers and herbicides for foliar and furrow injection applications

Some of the benefits include:-

- Increases plant growth rates
- Stimulates root growth
- Good food source for microbes
- Stimulates plants auxin production
- Improves drought resistance
- Increases yields
- Anti-oxidant
- Detoxification of pollutants including pesticides
- Liquid nitrogen uptake is enhanced when used in conjunction with Fulvic Acid

TYPICAL ANALYSIS

	G/L	W/V %
Potassium Fulvic Acid (<i>min</i>)	80	8
Potassium (K) (<i>Phosphate</i>)	16	1.6
Phosphorus (P) (<i>water soluble</i>)	11.6	1.16
Nitrogen (N) (<i>organic matter</i>)	9.2	0.92

pH 4.2

APPLICATION

*Foliar: Mix Potassium Fulvic Acid 1 part to 200 parts water and add to fertilisers. Do not mix concentrates together.

Discuss rates with your agent

*Furrow injection: Suitable to be mixed with liquid nitrogen. Discuss rates with your agent

PACKAGING

20Lt, 200Lt and 1000Lt
