

✓ Seed Dressing

Technical Brochure

Updated on: - 04 March 2011

Hi-Seed

Liquid seed dressing fertilizer blend high in phosphorous, manganese, zinc and iron in combination with complex amino acids.

Some of the benefits include:-

- Fertilizer input can be reduced
- Improves seed germination and promotes vigorous healthy roots
- Increases organic matter
- Reduces pruning effects of chemicals

TYPICAL ANALYSIS	G/L	% W/V
Phosphorous (P)	120	12
Zinc (Zn)	60	6.0
Manganese (Mn)	69	6.9
Sulphur (S)	68	6.8
Iron (Fe)	1.5	0.15

Contains complex amino acids

APPLICATION – Per ton of seed

- * Cereals - 5Lt concentrate with 1 to 3Lt water
- * Sorghum - 3Lt concentrate with 1 to 3Lt water
- * Maize/ Sweet Corn - 2Lt concentrate with 2Lt water
